MAGNUS EKO

Crafting Sustainability

Magnus EKO is passionately committed to preserving the health of our planet Earth, the well-being of our communities, and the health of every individual we touch. This philosophy is deeply embedded in our mission and vision, guiding us to create products and engage in practices that are environmentally responsible and community focused.

CERTIFICATION

Palmware

PRODUCT PEDIA

UNIQUE PROPERTIES

Certifications

SYSTEM, SUSTAINABILITY & SOCIAL COMPLIANCE

The Amfori Business Social Compliance Initiative, a prominent global business association advocating for sustainable trade, acknowledges the environmental, social, and governance performance of supply chains through audits and conformance. Magnus has been actively involved in this initiative since 2016.

As part of our commitment to CTPAT compliance, we conduct comprehensive risk assessments to identify security vulnerabilities, threats, and assess risks. We integrate sustainable measures to mitigate vulnerabilities.

Dun & Bradstreet intelligence provides data and analytics on business fundamentals and sustainability standards at Magnus. This assists customers in quantifying and evaluating the impact of financial risk and sustainability rankings.

The Forest Stewardship Council (FSC) certifies forests to ensure responsible management and compliance with the highest environmental and social standards. This certification is applicable to Magnus EKO's paper product business.

ClimatePartner

Through Climate Partner, Magnus contributes to limiting global warming by committing to extensive emissions reduction efforts. We have sponsored Clean Wind energy as part of the Climate Neutral Project (Project ID 20213-2208-1001).

Products bearing the USDA Certified Biobased symbol indicate compliance with biobased standards. Palm leaf products at Magnus meet these criteria, being entirely biobased. Their biobased content has been independently tested and approved by internationally accredited third-party laboratories.

Food Safe

To ensure food contact safety, heavy metal, microbes, pesticide, and migration tests are conducted through internationally accredited testing labs. Biodegradability & Compostability testing conform to global standards such as EN 13432, ASTM D6868-03, and ASTM D6400-04.

Magnus firmly believes in Quality Management Systems and the PDCA (Plan-Do-Check-Act) process. We embrace continuous improvement as a fundamental principle, extending to grassroots level employees.
